

FT5000

FT5000

For years, the ATM industry has trusted Triton for innovative technology that's practical and cost efficient, and Triton has delivered again with the FT5000, a versatile through-the-wall ATM that offers high performance for a surprisingly low investment.

*A high volume, reliable
through-the-wall
ATM you can afford.*

Our long-time experience in producing innovative, high quality cash dispensing machines has led us to develop this model focused on the financial institution market. The PC-based FT5000 includes Encrypting PIN Pad (EPP), rear access, and full ADA and Triple DES compliance. Planned enhancements include support for XFS, emulation and a variety of communication protocols.

But what makes the Triton model FT5000 most popular with banks and credit unions is its highly cost-efficient operation. Financial institutions can choose drive-up or walk-up configurations with one to four cassettes based on transaction volumes. You can count on the reliable operation that has made Triton a leader in the industry. Plus, the PC based Windows® operating system makes possible a long list of revenue generating value-added services.

Performance. Reliability. Easy, inexpensive service. Thanks to Triton, there's finally a through-the wall unit made just for you.
