

RL5000

*RL5000
with high
topper*

Triton's PC-based RL5000 is changing the way people think about ATMs. The all-new model offers a stunning 10.4-inch LCD display and supports a long list of value-added transactions. All at a much lower price point than other PC-based machines.

*It's simply the most
cost-competitive PC
ATM in the market.*

This new chapter in Triton's history of innovation is made possible by the Windows® based Intel® XScale™, an advanced PC platform that enables a new level of high-performance.

In addition to its low price, the RL5000 also offers an extremely low cost of operation. The wide range of dispensers available offers customers the ability to choose the capacity that most matches their usage, and—like all Triton technology—it's extremely easy to service. Plus the RL5000 has all the standards you're looking for in a new ATM: ADA compliance, an Encrypting PIN Pad (EPP), Triple DES compliance, and a surprisingly small footprint.

There's not another PC ATM on the market that offers the level of performance and cost-competitiveness delivered by the Triton model RL5000. The future of ATMs is here.

RL5000 IN DETAIL

The future of ATMs is here.

FEATURES:

- One to four cassettes
- Multiple dispenser options
- 10.4" (264 mm), VGA color display with 640 x 480 resolution
- 80 mm thermal printer with presenter
